

PROS OF SCHEDULES

What is a schedule?

Details pertaining to doors, windows, finish notes, cabinets and appliances are usually categorized into a schedule, or table, thus eliminating the need for numerous leaders and notes all over the drawing. By scheduling information into a central location it not only becomes easier to find, but makes the drawing look cleaner and more appealing to all parties involved.

Door Schedules

Door schedules show information pertaining to every door within a building. The following information is typical of a door schedule:

- Door reference number
- Door width, height and thickness
- Manufacturer, type and UL rating
- Door and frame materials
- Finish notes
- Details referencing the jamb, header and threshold assembly
- Additional notes as needed
